

# Manual test case

## TC1.4 Add product to basket

**Use case:** Add product to basket

**Scenario:** Check if product has been added to basket

**Precondition:** User access product page and select a specific product

### Test steps

- User logs in on the site
- Press StarRecords-button that's located in the top left corner to get to product page
- User picks a product he or she wants by clicking on that specific album
- If user wants to add album to his or hers basket the user press the green basket with a “+” in the right corner
- When clicked on add album the user get a red circle with a number in the black basket that's above the previously green basket
- User has now successfully added a product to his or her basket

### Expected

- User can add a product to the basket
