Manual Test Case

TC: Edit or modify a product detail

Use case: (TODO) Edit product details

Scenario: Check if the product data is edited in the database

Precondition: The admin should have already created an album by providing all the details

Test Steps

1. Select the albums button under the admin page.
2. From the list of albums select any album by clicking on its title.
3. The selected album is displayed with the title on the top followed by a cover image below it.
4. On the right side of the album title select the ✏ icon.
5. A dialog box is displayed showing the current details of the product.
6. You can fill in new details.
7. Write 'Dangerous' in the name section, '1991' in the year section.
8. Write 'Michael Jackson' in the artist section, 'Teddy Riley' in the producer section.
9. Under description write 'Pop song by American recording artist Michael Jackson.' and '12' in price section.
10. Select the save button.

Expected

1. In the firebase, the product details are updated with the new details.
2. The previous details are not shown but the product id remains the same.
